

ELECTRIC SURVEY RESULTS

In August 2000 the Commission adopted rules governing the customer satisfaction survey to be conducted by electric public utilities. Electric utilities include survey results in their annual reports filed with the Commission. Rules governing the survey are found in Subpart D of 83 Illinois Administrative Code 411. To review the entire survey or to see more information from the electric reliability report submitted by utilities, refer to the link on the ICC web site address <http://www.icc.state.il.us/icc/ec/docs.as;#rel>. Results from the remaining utilities will be available in 2003.

Shown below are customer responses to some key questions from the survey conducted during the fall of 2001.

Rating Questions (1-10 scale 10 being the highest) Results expressed as the mean

Providing reliable electric service

<i>Company</i>	<i>Residential</i>	<i>Commercial</i>
Ameren CIPS	8.77	8.67
